CORNER**

Giant Bubbles

You will need...

- Washing Up Liquid
- Water
- Small Cup for measuring
- 2 Straws (the bigger the better)
- String
- Washing Up Bowl or Deep Tray

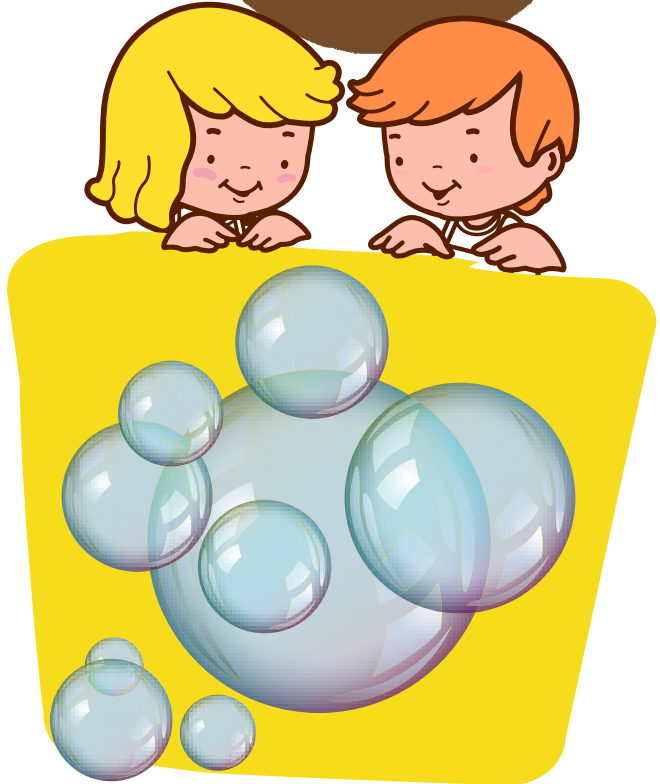

What to do...

one:

To make your bubble solution, put one cup of washing up liquid into your washing up bowl or tray, with 4 cups of water and swish together to make a bubbly mixture (to make more mixture, you can use big cups or double the amounts).

two:

To make your bubble wand, take your two straws and thread the string through each one, before tying it in a knot at the end to make a big hoop shape.

three:

Hold a straw in each hand, and pull apart to make a big 'hoop' shape with the string so that the bubbles can pass through it.

four:

Using the straws as handles, dip your wand into the bubble solution, then carefully lift it out and pull it through the air to make your giant bubble! Hold your arms high above your head for the best results!

all done!
